## WHICH WAY TO THE CASTLE?

Over scorching deserts, through dark icy caverns, around a fiery volcano, and under the leafy cover of a swampy jungle, you set out with three brave blonds to retrieve the treasures stolen by the Evil Master. Your goal is his castle far, far away.

Your friends are lightly armed, but you carry your trusty crossbow. By shooting its swift arrows, you can save yourself and your companions from the dangerous attacks of the Evil Master's creatures—scorpions, ants, pterodactyls, venacious plants, bats, snakes, and other hostile beings.

When you reach the castle, the Evil Master's expert archers await you, ready to test their aim with deadly arrows. Inside the castle, a fierce dragon also waits, guarding the treasure with its fiery breath.

Five adventurers have dared to make this trek. No one yet has come back alive.

## GETTING STARTED

1. With your Atari 7800 set up, insert the Crossbow cartridge into the console and plug a joystick or light gun into the left port.

8. Press **[Pause]** at any time to start a new game or press **[Reset]** to return to the title screen.

## PLAYING THE GAME

### Starting Your Adventure

Your adventure begins on the Map screen. This screen shows the eight Danger Zones you must pass through to reach the treasures.

You have to figure out which paths to take to reach the castle and claim the treasures. Begin by shooting with either the gun or the joystick at either the red or green path box. A path appears that leads you to your first Danger Zone.

## Protecting Your Friends

Once you get to a Danger Zone, the Evil Master's creatures immediately begin attacking your friends. If attacked, your friends dissolve. To stop the fearsome creatures you must shoot them with your gun or joystick. If you are using a gun, move the gun sight onto a creature to aim, and then shoot. If you are using a joystick, use it to move the cursor.

If you escort your friends safely through a Danger Zone, you return to the Map screen and choose a path once again. This time you choose a red, green, or blue path to arrive at a Danger Zone.

Once an adventurer dissolves, that friend is lost forever. If all adventurers are lost, your quest ends. When you make it safely through a Danger Zone, the survivors and, in some Danger Zones, a bonus friend will appear.

If you rescue the treasures, you confront the Evil Master himself. Fix at his red eyes to complete your quest, return to the Map screen, and start again.

## The Danger Zones

You start your trek with three adventuresome friends. You gain a new friend the first time you make it safely through each Danger Zone, except the Village and the Castle, up to a maximum of eight adventures at one time.

In the Desert, your friends are attacked by deadly scorpions, vultures, snakes, and ants. You gain another friend the first time you survive this zone.

While wandering through the **Caverns**, watch out for sweeping bats, falling stalactites, and a phisically ghost! Shoot down the two hanging stalactites to fill in the crevices in the path so you can get across. Another friend joins you the first time you make it safely through the Caverns.

The **Volcano** spews burning rocks and lava lava, so watch out! Shoot the resting rock to make a bridge over the lava river. Passing by the volcano safely for the first time earns you another friend.

In the steaming depths of the **Jungle**, wicked monkeys hurl coconuts and blowers with deadly aim. Voracious plants lie in wait for the adventurers. The first time you survive the **Jungle Zone**, you are joined by a new friend.

In the **Village**, the horrors of the night swirl. From the street sinister agents appear in the windows, wicked pop up out of nowhere, and even the street lights are controlled by the Evil Master. From above, chilling ghosts attack, deadly lightning bolts fall, and a cruel witch appears on rooftops, ready to drop devastating fireballs. In this unfriendly village, no bonus friends can join you.

At the **River**, the scenery is beautiful but perilous every step of the way. You are threatened on the bridge by mighty bouncing boulders and swooping pterodactyls. The Evil Master has many spies here. You'll find jumping fish, hungry alligators, and slime monsters in the river, leaping frogs on the overbank, and a bird hidden in the tree.

If you're not careful, you might just meet your match at the **Drawbridge**, where the Evil Master's loyal archers and pterodactyls try to stop you. Hungry alligators wait in the moat, snapping their jaws at you. To enter the castle, shoot through the two ropes holding up the drawbridge.

At the **Castle Hall**, a dragon breathes fire, daggers drop from the ceiling, and arrows fly from the walls. A trapdoor is your last barrier to claiming the treasure—shoot the statue's testing staff to open it.

Shoot the **Evil Master's Eye** that appears once on every screen to gain bonus points.

If you make it past the Castle Hall, you confront the **Evil Master himself**. Here he makes his last last—some attempt to do you in and reclaim the treasure. Your only hope is to shoot his eyes when they glow red.
